Tracking
AoI
$\Delta(t) = t - u(t)$
$\mathcal{A}_i$
t_{i-1} t_i t
What is the evoluation of AoI in short-packet communications?
a) Age-of-Information
Private
Common
Splitter
Combiner
Encoder
Precoder
Does RSMA improve the reliability in short-packet communications?
b) Rate-splitting multiple access
Telemedicine
Metaverse
100 GHz - 10 THz
Radio
Microwave
mmWave
THz
IR
Visible light
UV
X-Rays
Gamma
frequency
What THz band meets broadband URLLC services?
c) Terahertz communications
How RIS enhances in short-packet communications?
RIS
Indoor
Outdoor
d) Reconfigurable intelligent surface
Industrial Automation
How many RIS elements meet communications of 1 ms and BLER of 10^{-5}?
RIS
Resource allocation
e) Deep Learning-based URLLC
